INVOICE

Project delivery

DELIVERABLE	AMOUNT (EUR)
-------------	-----------------

Part 1 Frontend Design

€ _____

- Complete design system: brand palette, typography scale, spacing tokens, radius + shadow scale
- 20+ screens designed pixel-perfect against approved prototypes: Dashboard, Clients, Properties, Schedule, Employees, Employee Overview, Invoices, Reports, Monthly Report, Notifications, Chat, Settings, Client Statement, Auth flows, Onboarding wizard
- Full responsive layouts across mobile, tablet, desktop
- 3-language interface with 2,485 strings per locale (German, English, Tamil) — strict parity
- Component library: buttons, cards, chips, forms, toggles, tables, modals, avatars, sidebars, dialogs
- WCAG 2.1 AA accessibility: keyboard navigation, ARIA labels, focus states, colour contrast
- Brand asset production: logo variants, iconography, empty states, splash screens

Part 2 Frontend Development

€ _____

- Next.js 14 App Router with TypeScript (strict mode) and Tailwind CSS 3.4
- Server-rendered pages with streaming and per-request caching
- Full CRUD flows for Clients, Properties, Employees, Shifts, Invoices, Vacation, Training, Damage reports
- Realtime features: team chat with typing indicator, live notifications, presence
- File upload flows: user avatars, org logo, damage photos, training videos, invoice PDF viewer
- Multi-step wizards: new-client intake (Residential / Commercial / Alltagshilfe), employee onboarding, invoice draft editor
- Form validation with Zod schemas at both client and server boundaries
- Performance optimisation: React cache() for cross-loader deduplication, parallelised data-fetch waterfalls, request-scoped device heartbeat throttle
- Mobile app foundation (Expo SDK 52) with Auth + 2FA, MyProfile, Schedule with GPS clock-in / clock-out / break

Part 3 Security & Compliance

€ _____

- Multi-factor authentication (TOTP) — mandatory for Management + Project Manager roles per spec §6.2
- Three-tier Role-Based Access Control (Admin / Project Manager / Field Staff) enforced at UI, server-action, and database layers
- Row-Level Security policies on every table (org boundary, per-user scope, soft-delete guards)
- Session management with per-device tracking, revocation, and login-alert emails
- Audit log of every state-changing action (who / what / when / from where)
- GPS-verified check-in and check-out for field staff — haversine distance check against property location
- Password strength requirements, secure signup trigger, and orphan-account repair migrations
- DSGVO / GDPR-compliant data handling: consent tracking, data-subject-request-ready audit trail, secure storage
- Rate limiting on heavy actions (Lexware sync, payment pull, invoice generation)
- Security review pipeline: automated permission checks, cross-role access-matrix verification

Part 4 Backend Development

€ _____

- Supabase Postgres schema across 54+ migrations covering the full data model — organisations, profiles, employees, clients, properties, shifts, time entries, invoices, invoice items, invoice payments, vacation, training modules, damage reports, chat channels, chat members, chat messages, notifications, audit log, settings, user devices, api keys, monthly report deliveries
- 30+ server actions with permission gating, Zod-validated inputs, and audit-log side-writes
- Lexware Office API integration: contact upsert with dedup, invoice push, payment pull, reconciliation of paid vouchers, retry sweep with 30-min cooldown
- Cron jobs: nightly monthly-Alltagshilfe report to Management, missed-checkout sweep (every 15 min), Lexware retry sweep, payment sync from Lexware, DB backup
- Transactional email delivery via Resend: monthly report, invoice notifications, password reset, invitation emails
- Web Push notifications with VAPID for shift changes and urgent alerts
- Realtime channels for team chat, typing indicators, and dashboard KPI freshness
- PDF generation (pdf-lib) for invoices, client statements, monthly reports, working-hours exports
- Trigger-based signup flow with placeholder employee auto-attach and bulletproof error handling
- Performance: single-round-trip dashboard KPI RPC, request-scoped user caching, Vercel Frankfurt region colocation with Supabase
- Full-text search RPC, aging report RPC, monthly report aggregation
